

WATER EMERGENCY TRANSPORTATION AUTHORITY

Downtown San Francisco Ferry Terminal Expansion Project Fact Sheet

April 2011

The San Francisco Bay Area Water Emergency Transportation Authority (WETA) is proposing expansion and improvements to the Downtown San Francisco Ferry Terminal at the Port of San Francisco Ferry Building (see project area figure). The project would expand the number of ferry gates, improve pedestrian circulation and ferry patron boarding, and enhance emergency response capabilities to evacuate people from San Francisco in the event of a major catastrophic event.

The project is located in the northeastern section of San Francisco, California, at the San Francisco Ferry Building, situated at the foot of Market Street. The study area encompasses Port of San Francisco property between Pier 1 on the north and Pier 14 on the south, and includes the Ferry Building, ferry gates, and the Ferry Plaza. The Downtown San Francisco Ferry Terminal currently accommodates six ferry routes serving more than 10,000 passengers with approximately 130 ferry arrivals and departures daily. The proposed project would make improvements to gates and boarding areas to accommodate anticipated increases in ferry ridership as new ferry services from downtown San Francisco to Berkeley, Treasure Island, Hercules, Richmond, Redwood City, Martinez, and Antioch are introduced between 2014 and 2030.
